

Complexity, Delivered

A solution for everyone

Challenge:

One of the largest global telecommunication companies needed a solution for cloud adoption and use in their organization. The solution needed to encompass both internal business units and external customers in a way that didn't require multiple cloud solutions.

Solution:

WorldLink 's comprehensive solution included the following steps to ensure success:

- Multi-tenant platform
- Custom portals for various departments and end customers
- Central administration for IT

WorldLink provided a quick and simplified solution saving the client time and resources.

Client Outcome:

The WorldLink solution provided the client business units with a global solution that offered 7 different cloud regions. The solution also provided a self-service portal which allowed both business units and external clients to request and deploy cloud resources with a single click. Finally, the solution allowed for simplified usage tracking and chargeback mechanisms.
